AUTHOR INDEX

Volumes 71–74, 1988

ARMSTRONG, ROBERT C., and KOSZYKOWSKI, M. L.: A Theoretical and Numerical Study of Radiative Ignition and Deradiative Extinction in Solid Propellants, 72: 13

ARPACI, VEDAT S., and SELAMET, AHMET: Entropy Production in Flames, 73: 251

AYYASWAMY, P. S.: See Gogos, G.

BABUSHOK, V. I., and GOL'DSHTEIN, V. M.: Structure of the Thermal Explosion Limit, 72: 221

BARNARD, J. A.: Book Review of "Gaseous Detonations: Their nature, effects and control" by M. A. Nettleton, 72: 339

BARTLEET, T. G.: See Weinberg, F. J.

BAULCH, D. L., GRIFFITHS, J. F., PAPPIN, AMANDA, J., and SYKES, ANNE F.: Stationary-State and Oscillatory Combustion of Hydrogen in a Well-Stirred Flow Reactor, 73: 163

BDZIL, JOHN B.: See Stewart, D. Scott

BERRY, G. F.: See Wang, C. S.

BICEN, A. F., TSE, D., and WHITELAW, J. H.: Flow and Combustion Characteristics of an Annular Combustor, 72: 175

BILGER, R. W.: Book Review of "Transport Processes in Chemically Reacting Flow Systems" by Daniel E. Rosner, 71: 215

BILGER, R. W.: See Masri, A. R.

BILLICK, IRWIN H.: See Reuther, James J.

BIRKAN, M. A., and LAW, C. K.: Asymptotic Structure and Extinction of Diffusion Flames with Chain Mechanism, 73: 127

BITTNER, J., KOHSE-HOINGHAUS, K., MEIER, U., KELM, S., and JUST, TH.: Determination of Absolute H Atom Concentrations in Low-Pressure Flames by Two-Photon Laser-Excited Fluorescence, 71: 41

BLINT, RICHARD J.: See Harris, Stephen J.

BOETTNER, J. C.: See Dagaut, P.

BORGHI, R.: See Magre, P.

BOUKHALEA, ABDELKRIM, and GÖKALP, ISKENDER: Influence of the Damköhlker Number on the Average Thickness of Conical Turbulent Premixed Methane/Air Flames, 73: 75

BRADLEY, DEREK, KWA, L. K., LAU, A. K. C., MISSAGHI, M., and CHIN, S. B.: Laminar Flamelet Modeling of Recirculating Premixed Methane and Propane-Air Combustion, 71: 109

BRANCH, MELVYN, C.: See Sadeqi, Mohammed

BREWSTER, M. QUINN, and TAYLOR, DALE M.: Radiative Properties of Burning Aluminum Droplets, 72: 287

BRILL, T. B.: See Cronin, J. T.

BRILL, THOMAS B.: See Palopoli, Stephen F.

BROPHY, J. H.: See Weinberg, F. J.

BROWN, ROBERT C., and ERASLAN, AHMET N.: Simulation of Ionic Structure in Lean and Close-to-Stoichiometric Acetylene Flames, 73: 1

BROWN, ROBERT C.: See Eraslan, Ahmet N.

BUCKIUS, R. O.: See Fakheri, A.

BYUN, K.-H.: See Smith, T. F.

CAIRNIE, L. R.: See Harrison, A. J.

CALCOTE, H. F.: Why Does Soot Inception Stop?, 71: 105

CALCOTE, H. F., and KEIL, D. G.: Ion-Molecule Reactions in Sooting Acetylene-Oxygen Flames, 74, 131

CANT, R. S.: See Chaté, H.

CARANGELO, ROBERT M.: See Solomon, Peter R.

CARLETON, F. B.: See Weinberg, F. J.

CATHONNET, M.: See Dagaut, P.

CERNANSKY, NICHOLAS P.: See Danis, Allen M.

CHAMPION, M., DESHAIES, B., and JOULIN, G.: Relative Influences of Convective and Diffusive Transports During Spherical

Flame Initiation, 74, 161
CHANG, K. C.: See Wang, C. S.
CHATÉ, H., and CANT, R. S.: Relevant Scales in the Corrugated Flamelet Region, 74: 1
CHEN, L.-D.: See Smith, T. F.
CHENG, R. K.: See Gökalp, I.
CHIN, S. B.: See Bradley, Derek
CHUNG, S. H., and LAW, C. K.: An Integral Analysis of the Structure and Propagation of Stretched Premixed Flames, 72: 325
COLLIN, G.: See Magre, P.
CORREA, S. M., GULATI, A., and POPE, S. B.: Assessment of a Partial-Equilibrium/ Monte Carlo Model for Turbulent Syngas Flames, 72: 159
CRESCITELLI, SILVESTRO: See Di Blasi, Colomba
CRONIN, J. T., and BRILL, T. B.: Thermal Decomposition of Energetic Materials 29—The Fast Thermal Decomposition Characteristics of a Multicomponent Material: Liquid Gun Propellant 1845, 74: 81

DAGAUT, P., CATHONNET, M., BOETTNER, J. C., and GAILLARD, F.: Kinetic Modeling of Ethylene Oxidation, 71: 295
DANIS, ALLEN M., NAMER, IZAK, and CERNANSKY, NICHOLAS P.: Droplet Size and Equivalence Ratio Effects on Spark Ignition of Monodisperse N-Heptane and Methanol Sprays, 74, 285
DEGROOT, WILHELMUS A.: See Strahle, Warren C.
DENNIS, J. S., and HAYHURST, A. N.: The Formation of SO_3 in a Fluidized Bed, 72: 241
DESHAIES, B.: See Champion, M.
DESHPANDE, GIRISH V.: See Solomon, Peter R.
DI BLASI, COLOMBA, CRESCITELLI, SILVESTRO, and RUSSO, GENNARO: Near Limit Flame Spread Over Thick Fuels in a Concurrent Forced Flow, 72: 205
DIBBLE, R.: See Magre, P.
DIBBLE, R. W.: See Masri, A. R.
DOCHERTY, P., and FAIRWEATHER, M.: Predictions of Radiative Transfer from Nonhomgeneous Combustion Products Using the Discrete Transfer Method, 71: 79
DOHERTY, RUTH M.: See Zerilli, Frank J.

The editors wish to thank Professor Lester D. Savage of the Department of Mechanical Engineering of the University of Illinois at Urbana-Champaign for writing and running the computer program that alphabetizes the author index and prints it in copy-ready form.

SUBJECT INDEX

Volumes 71–74, 1988

1. ASYMPTOTIC ANALYSES

Kinetic Extinction: A Three-Step Model, 72: 27

The Lean Flammability Limit: A Four-Step Model, 72: 35

Structure of the Thermal Explosion Limit, 72: 221

The Shock Dynamics of Stable Multidimensional Detonation, 72: 311

An Integral Analysis of the Structure and Propagation of Stretched Premixed Flames, 72: 325

Asymptotic Structure and Extinction of Methane-Air Diffusion Flames, 73: 23

Asymptotic Structure and Extinction of Diffusion Flames with Chain Mechanism, 73: 127

Propagation and Extinction of a Flame in a Stagnation—Point Flow, 73: 303

Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337

2. COMBUSTION IN PRACTICAL SYSTEMS

Wave Processes in Scramjet Thrust Generation, 71: 63

Predictions of Radiative Transfer from Nonhomogeneous Combustion Products Using the Discrete Transfer Method, 71: 79

The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model, 72: 1

Cyclic Variations and Turbulence Structure in Spark-Ignition Engines, 72: 73

Indicators of Ignition for Clouds of Pulverized Coal, 72: 111

Flow and Combustion Characteristics of an Annular Combustor, 72: 175

Velocity Measurements in Swirl Driven Pulverized Coal Combustion Chamber, 72: 193

Effect of Exhaust Gas Recirculation on Diesel Knock Intensity and Its Mechanism, 72: 225

Partial Oxidation of Fuel-Rich Mixtures in a Spouted Bed Combustor, 72: 235

The Formation of SO_3 in a Fluidized Bed, 72: 241

Radiative Properties of Burning Aluminum Droplets, 72: 287

Combustion of Pulverized Coal Using Waste Carbon Dioxide and Oxygen, 72: 301

Book Review of "Power Generation Calculations Reference Guide" by Tyler G. Hicks, 72: 337

Formation and Behavior of Submicron Fly Ash in Pulverized Coal Combustion Furnace, 74: 71

The Oxygen Reaction Order of SO_2 with CaO, 74: 107

Reduction of NO Emissions from a Coal-Fired Fluidized Bed Combustor by Addition of NH_3 Through a Watercooled Injector, 74: 171

Influence of Ash on Particle Size Distribution Evolution During Coal Combustion, 74: 207

Erratum: "The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model," *Combust. Flame* 72:1–12(1988), 74: 219

Low-Rank Coal-Water Fuel Combustion in a Laboratory-Scale Furnace, 74: 255

3. COMBUSTION STABILITY/INSTABILITY

Influence of Ducting on Explosion Pressure: Small-Scale Experiments, 71: 51

Use of Observed Transitions for Classification of Dynamic Systems—Application to Cool Flames, 71: 267

Stationary-State and Oscillatory Combustion of Hydrogen in a Well-Stirred Flow Reactor, 73: 163

Experimental Study on Cellular Flame Propagation of Blend Fuels, 73: 207

4. COMBUSTION SYSTEMS: ANALYTIC AND NUMERICAL DESCRIPTIONS

The Development and Experimental Validation of a Mathematical Model for Predicting Hot-Surface Autoignition Hazards Using Complex Chemistry, 71: 1

On the Determination of Critical Ambient Temperatures and Critical Initial Temperatures for Thermal Ignition, 71: 101
Book Review of "Combustion" by I. Glassman, 71: 107
Some Notes on the First Theories of the Flame Velocity in Gaseous Mixtures, 71: 179
Book Review of "Transport Processes in Chemically Reacting Flow Systems" by Daniel E. Rosner, 71: 215
Book Review of "Advanced Combustion Methods" by Felix J. Weinberg, Editor, 71: 217
Use of Observed Transitions for Classification of Dynamic Systems—Application to Cool Flames, 71: 267
The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model, 72: 1
A Theoretical and Numerical Study of Radiative Ignition and Deradiative Extinction in Solid Propellants, 72: 13
Kinetic Extinction: A Three-Step Model, 72: 27
The Lean Flammability Limit: A Four-Step Model, 72: 35
Near Limit Flame Spread Over Thick Fuels in a Concurrent Forced Flow, 72: 205
Structure of the Thermal Explosion Limit, 72: 221
An Integral Analysis of the Structure and Propagation of Stretched Premixed Flames, 72: 325
Response and Flamelet Structure of Stretched Premixed Methane-Air Flames, 73: 45
Effects of Radiative and Conductive Transfer on Thermal Ignition, 73: 67
Some Fluid Dynamic Considerations in the Modeling of Flames, 73: 111
Stationary-State and Oscillatory Combustion of Hydrogen in a Well-Stirred Flow Reactor, 73: 163
Pressure-Containing Correlations in Variable Density and Turbulent Reacting Flows, 73: 215
Global Reaction Schemes for Hydrocarbon Combustion, 73: 233
Entropy Production in Flames, 73: 251
Effects of Variable Density on a Tubular Flame, 73: 287
Propagation and Extinction of a Flame in a Stagnation—Point Flow, 73: 303
On the Controlling Parameter in the Gasification Behavior of Multicomponent Droplets, 73: 331
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
Chemiionization and Ion-Molecule Reactions in Fuel-Rich Acetylene Flames, 74: 19
Ignition Processes in Hydrogen-Oxygen Mixtures, 74: 53
Evidence for Formation of CO2 in the Vicinity of Burning Pulverized Carbon Particles, 74: 91
A Model for the Evaporation of a Slowly Moving Droplet, 74: 111
Relative Influences of Convective and Diffusive Transports During Spherical Flame Initiation, 74: 161
Combustion of HAN-Based Liquid Monopropellants Near the Thermodynamic Critical Point, 74: 179
Erratum: "The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model," *Combust. Flame* 72:1–12(1988), 74: 219
Book Review of "Numerical Simulation of Reactive Flow" by Elaine S. Oran and Jay P. Boris, 74: 311

5. COMBUSTION SYSTEMS: MODELING AND SCALING

Wave Processes in Scramjet Thrust Generation, 71: 63
Laminar Flamelet Modeling of Recirculating Premixed Methane and Propane-Air Combustion, 71: 109
Models of Tar Formation During Coal Devolatilization, 71: 137
Some Notes on the First Theories of the Flame Velocity in Gaseous Mixtures, 71: 179
Book Review of "Transport Processes in Chemically Reacting Flow Systems" by Daniel E. Rosner, 71: 215
Book Review of "Advanced Combustion Methods" by Felix J. Weinberg, Editor, 71: 217
The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model, 72: 1
Combustion of Pulverized Coal Using Waste Carbon Dioxide and Oxygen, 72: 301
Scalar Properties in the Overfire Region of Soot-

ing Turbulent Diffusion Flames, 73: 315
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
Relevant Scales in the Corrugated Flamelet Region, 74: 1
Extraction of Useful Data from Noise-Contaminated PDFs, 74, 193
Erratum: "The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model," *Combust. Flame* 72:1–12(1988), 74: 219
Book Review of "Fundamental Aspects of Polymer Flammability" by G. Cox and G. Stevens, Editors, 74, 311
Book Review of "P. H. Thomas Fire Research Station 1951–1986, Selected Papers by P. H. Thomas" 74: 311

6. COMBUSTION SYSTEMS: NEW-NONE

7. DETONATIONS, CONDENSED PHASE AND HETEROGENEOUS
Thermal Decomposition of Energetic Materials 27. Synthesis, Characterization and Thermolysis of Cu(II)-Doped "Blue RDX," 72: 153
A Comparison of Calculations of Detonation Pressures for a Homologous Series of Polynitroaliphatic Explosives by Different Equations of State, 74, 295

8. DETONATIONS, GAS PHASE
Book Review of "Combustion" by I. Glassman, 71: 107
Deflagration to Detonation Transition in Mixtures of Alkane LNG/LPG Constituents with O_2/N_2, 72: 63
The Shock Dynamics of Stable Multidimensional Detonation, 72: 311
Book Review of "Gaseous Detonations: Their nature, effects and control" by M. A. Nettleton, 72: 339
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
Book Review of "Numerical Simulation of Reactive Flow" by Elaine S. Oran and Jay P. Boris, 74, 311

9. DIAGNOSTICS, LASER
Determination of Absolute H Atom Concentrations in Low-Pressure Flames by Two-Photon Laser-Excited Fluorescence, 71: 41
Further Studies by CARS of Premixed Turbulent Combustion in a High Velocity Flow, 71: 147
A Shock Tube Investigation of the Rate of Soot Formation for Benzene, Toluene, and Toluene/n-Heptane Mixtures, 71: 219
Turbulent Nonpremixed Flames of Methane Near Extinction: Mean Structure from Raman Measurements, 71: 245
Spectral Behavior of Velocity Fluctuations in Premixed Turbulent Flames, 71: 313
Measurement of Various Terms in the Turbulent Kinetic Energy Balance within a Flame and Comparison with Theory, 72: 131
Velocity Measurements in a Swirl Driven Pulverized Coal Combustion Chamber, 72: 193
Influence of the Damköhlker Number on the Average Thickness of Conical Turbulent Premixed Methane/Air Flames, 73: 75
Finite Chemical Kinetic Effects in a Subsonic Turbulent Hydrogen Flame, 73: 195
Turbulent Nonpremixed Flames of Methane Near Extinction: Probability Density Functions, 73: 261
The Effect of Initial Conditions on the Propagation of a Premixed Flame in a Mixing Layer, 74: 9
Scalar Dissipation Measurements in the Developing Region of a Jet, 74: 147
Concentration Measurements of Atomic Hydrogen in Subatmospheric Premixed $C_2H_4/O_2/Ar$ Flat Flames, 74: 221
Conditional Probability Density Functions Measured in Turbulent Nonpremixed Flames of Methane Near Extinction, 74: 267

10. DIAGNOSTICS, OPTICAL AND PHOTOGRAPHIC
Determination of Absolute H Atom Concentrations in Low-Pressure Flames by Two-Photon Laser-Excited Fluorescence, 71: 41
Further Studies by CARS of Premixed Turbulent

Combustion in a High Velocity Flow, 71: 147
Characterization of Flame Spread Over PMMA Using Holographic Interferometry Sample Orientation Effects, 71: 189
Microwave Resonance Lamp Absorption Technique for Measuring Temperature and OH Number Density in Combustion Environments, 73: 89
Burning Characteristics of Premixed Sprays and Gas-Liquid Coburning Mixtures, 74: 39
A Model for the Evaporation of a Slowly Moving Droplet, 74, 111

11. DIAGNOSTICS, OTHER
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107
Real-Time Analysis of Polyaromatic Hydrocarbons in Flames Using Atmospheric Pressure Ionization and Tandem Mass Spectrometry, 73: 147
The Effect of Initial Conditions on the Propagation of a Premixed Flame in a Mixing Layer, 74: 9
Evidence for Formation of CO_2 in the Vicinity of Burning Pulverized Carbon Particles, 74: 91

12. EXPERIMENTAL TECHNIQUES OR RESULTS, BURNERS
Determination of Absolute H Atom Concentrations in Low-Pressure Flames by Two-Photon Laser-Excited Fluorescence, 71: 41
Why Does Soot Inception Stop?, 71: 105
Book Review of "Advanced Combustion Methods" by Felix J. Weinberg, Editor, 71: 217
Turbulent Nonpremixed Flames of Methane Near Extinction: Mean Structure from Raman Measurements, 71: 245
A Continous Flow, Gaseous Formaldehyde Generation System for Combustion Studies, 71: 325
The Measurement of NO2 from Gas Flames, 71: 331
Erratum: "Comparative Study of Soot Formation on the Centerline of Axisymmetric Laminar Diffusion Flames: Fuel and Temperature Effects" *Combust. Flame* 70:225–241(1987), 71: 337
Formation of Small Aromatic Molecules in a Sooting Ethylene Flame, 72: 91
Measurement of Various Terms in the Turbulent Kinetic Energy Balance within a Flame and Comparison with Theory, 72: 131
Assessment of a Partial-Equilibrium/Monte Carlo Model for Turbulent Syngas Flames, 72: 159
Flow and Combustion Characteristics of an Annular Combustor, 72: 175
Partial Oxidation of Fuel-Rich Mixtures in a Spouted Bed Combustor, 72: 235
The Formation of SO_3 in a Fluidized Bed, 72: 241
Combustion of Pulverized Coal Using Waste Carbon Dioxide and Oxygen, 72: 301
Influence of the Damköhlker Number on the Average Thickness of Conical Turbulent Premixed Methane/Air Flames, 73: 75
Microwave Resonance Lamp Absorption Technique for Measuring Temperature and OH Number Density in Combustion Environments, 73: 89
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107
Real-Time Analysis of Polyaromatic Hydrocarbons in Flames Using Atmospheric Pressure Ionization and Tandem Mass Spectrometry, 73: 147
A Study of Inhibition Effects of Silane Combustion by Additive Gases, 73: 187
Finite Chemical Kinetic Effects in a Subsonic Turbulent Hydrogen Flame, 73: 195
Experimental Study on Cellular Flame Propagation of Blend Fuels, 73: 207
Structure of a Split Gas Flame, 73: 221
Turbulent Nonpremixed Flames of Methane Near Extinction: Probability Density Functions, 73: 261
Scalar Properties in the Overfire Region of Sooting Turbulent Diffusion Flames, 73: 315
The Effect of Initial Conditions on the Propagation of a Premixed Flame in a Mixing Layer, 74: 9
Burning Characteristics of Premixed Sprays and Gas-Liquid Coburning Mixtures, 74: 39
Formation and Behavior of Submicron Fly Ash in

Pulverized Coal Combustion Furnace, 74: 71
Concentration Measurements of Atomic Hydrogen in Subatmospheric Premixed $C_2H_4/O_2/Ar$ Flat Flames, 74: 221
Low-Rank Coal-Water Fuel Combustion in a Laboratory-Scale Furnace, 74: 255
Conditional Probability Density Functions Measured in Turbulent Nonpremixed Flames of Methane Near Extinction, 74: 267
Droplet Size and Equivalence Ratio Effects on Spark Ignition of Monodisperse N-Heptane and Methanol Sprays, 74: 285

13. EXPERIMENTAL TECHNIQUES OR RESULTS, PLUG FLOW REACTORS
The Chemistry of Premixed Hydrocarbon/Air Combustion in a Fluidized Bed, 71: 35
Book Review of "Combustion" by I. Glassman, 71: 107
Laminar Flamelet Modeling of Recirculating Premixed Methane and Propane-Air Combustion, 71: 109
Indicators of Ignition for Clouds of Pulverized Coal, 72: 111
Combustion of Hydrogen-Rich Mixtures on a Nickel Oxide Catalyst, 72: 259
Evidence for Formation of CO_2 in the Vicinity of Burning Pulverized Carbon Particles, 74: 91
The Oxygen Reaction Order of SO_2 with CaO, 74: 107

14. EXPERIMENTAL TECHNIQUES OR RESULTS, QUASI-STATIC VESSELS
On the Determination of Critical Ambient Temperatures and Critical Initial Temperatures for Thermal Ignition, 71: 101
Book Review of "Combustion" by I. Glassman, 71: 107
Use of Observed Transitions for Classification of Dynamic Systems—Application to Cool Flames, 71: 267
Spark Ignition of Near the Lean Limit CH_4-Air Mixtures at Low Pressure, 73: 99
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107

15. EXPERIMENTAL TECHNIQUES OR RESULTS, SHOCK TUBES
A Shock Tube Investigation of the Rate of Soot Formation for Benzene, Toluene, and Toluene/n-Heptane Mixtures, 71: 219
Kinetic Modeling of Ethylene Oxidation, 71: 295
Deflagration to Detonation Transition in Mixtures of Alkane LNG/LPG Constituents with O2/N2, 72: 63

16. EXPERIMENTAL TECHNIQUES OR RESULTS, WELL-STIRRED REACTORS
The Development and Experimental Validation of a Mathematical Model for Predicting Hot-Surface Autoignition Hazards Using Complex Chemistry, 71: 1
Kinetic Modeling of Ethylene Oxidation, 71: 295
The Measurement of NO_2 from Gas Flames, 71: 331
A Kinematic Modeling Study of n-Pentane Oxidation in a Well-Stirred Reactor, 72: 45
Flow and Combustion Characteristics of an Annular Combustor, 72: 175
Velocity Measurements in a Swirl Driven Pulverized Coal Combustion Chamber, 72: 193
Stationary-State and Oscillatory Combustion of Hydrogen in a Well-Stirred Flow Reactor, 73: 163

17. FIRE OR EXPLOSION PHENOMENA, COMBUSTION SAFETY
The Development and Experimental Validation of a Mathematical Model for Predicting Hot-Surface Autoignition Hazards Using Complex Chemistry, 71: 1
Influence of Ducting on Explosion Pressure: Small-Scale Experiments, 71: 51
Characterization of Flame Spread Over PMMA Using Holographic Interferometry Sample Orientation Effects, 71: 189
Deflagration to Detonation Transition in Mixtures of Alkane LNG/LPG Constituents with O_2/N_2, 72: 63
Near Limit Flame Spread Over Thick Fuels in a Concurrent Forced Flow, 72: 205
Book Review of "Gaseous Detonations: Their nature, effects and control" by M. A. Nettleton, 72: 339

Scalar Properties in the Overfire Region of Sooting Turbulent Diffusion Flames, 73: 315
Book Review of "Fundamental Aspects of Polymer Flammability" by G. Cox and G. Stevens, Editors, 74: 311
Book Review of "P. H. Thomas Fire Research Station 1951-1986, Selected Papers by P. H. Thomas", 74: 311

18. FLAME IGNITION OR STABILIZATION
The Development and Experimental Validation of a Mathematical Model for Predicting Hot-Surface Autoignition Hazards Using Complex Chemistry, 71: 1
Book Review of "Combustion" by I. Glassman, 71: 107
Combustion of a Carbon Surface in a Stagnation Point Flow Field Part II: Ignition and Quench Phenomena, 71: 169
Indicators of Ignition for Clouds of Pulverized Coal, 72: 111
An Experimental and Theoretical Study of Autoignition on a Horizontal Hot Pipe, 72: 119
Effects of Radiative and Conductive Transfer on Thermal Ignition, 73: 67
Spark Ignition of Near the Lean Limit CH_4-Air Mixtures at Low Pressure, 73: 99
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107
A Study of Inhibition Effects of Silane Combustion by Additive Gases, 73: 187
Structure of a Split Gas Flame, 73: 221
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
Ignition Processes in Hydrogen-Oxygen Mixtures, 74: 53
Relative Influences of Convective and Diffusive Transports During Spherical Flame Initiation, 74, 161
Interactions Between Gaseous Electrical Discharges and Single Liquid Droplets, 74, 233
Droplet Size and Equivalence Ratio Effects on Spark Ignition of Monodisperse N-Heptane and Methanol Sprays, 74, 285
Book Review of "Fundamental Aspects of Polymer Flammability" by G. Cox and G. Stevens, Editors, 74: 311
Book Review of "P. H. Thomas Fire Research Station 1951-1986, Selected Papers by P. H. Thomas", 74: 311

19. FLAME QUENCHING OR EXTINCTION
Book Review of "Combustion" by I. Glassman, 71: 107
Combustion of a Carbon Surface in a Stagnation Point Flow Field Part II: Ignition and Quench Phenomena, 71: 169
Turbulent Nonpremixed Flames of Methane Near Extinction: Mean Structure from Raman Measurements, 71: 245
Experimental Studies of Lower Flammability Limits of Gases and Mixtures of Gases at Elevated Temperatures, 71: 283
A Theoretical and Numerical Study of Radiative Ignition and Deradiative Extinction in Solid Propellants, 72: 13
Kinetic Extinction: A Three-Step Model, 72: 27
The Lean Flammability Limit: A Four-Step Model, 72: 35
Near Limit Flame Spread Over Thick Fuels in a Concurrent Forced Flow, 72, 205
Asymptotic Structure and Extinction of Methane-Air Diffusion Flames, 73: 23
Response and Flamelet Structure of Stretched Premixed Methane-Air Flames, 73: 45
Asymptotic Structure and Extinction of Diffusion Flames with Chain Mechanism, 73: 127
Finite Chemical Kinetic Effects in a Subsonic Turbulent Hydrogen Flame, 73: 195
Turbulent Nonpremixed Flames of Methane Near Extinction: Probability Density Functions, 73: 261
Effects of Variable Density on a Tubular Flame, 73: 287
Propagation and Extinction of a Flame in a Stagnation—Point Flow, 73: 303
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
The Effect of Initial Conditions on the Propagation of a Premixed Flame in a Mixing Layer, 74: 9
Conditional Probability Density Functions Measured in Turbulent Nonpremixed Flames of Methane Near Extinction, 74: 267
Book Review of "Fundamental Aspects of Poly-

mer Flammability'' by G. Cox and G. Stevens, Editors, 74: 311

20. FLAMES, DIFFUSION

Wave Processes in Scramjet Thrust Generation, 71: 63

Turbulent Nonpremixed Flames of Methane Near Extinction: Mean Structure from Raman Measurements, 71: 245

Erratum: ''Comparative Study of Soot Formation on the Centerline of Axisymmetric Laminar Diffusion Flames: Fuel and Temperature Effects'' *Combust. Flame* 70:225–241(1987), 71: 337

Assessment of a Partial-Equilibrium/Monte Carlo Model for Turbulent Syngas Flames, 72: 159

Flow and Combustion Characteristics of an Annular Combustor, 72: 175

Near Limit Flame Spread Over Thick Fuels in a Concurrent Forced Flow, 72: 205

Book Review of ''Combustion, Flames & Explosions of Gases, 3rd edition,'' by B. Lewis and G. von Elbe, 73: 107

Asymptotic Structure and Extinction of Diffusion Flames with Chain Mechanism, 73: 127

Real-Time Analysis of Polyaromatic Hydrocarbons in Flames Using Atmospheric Pressure Ionization and Tandem Mass Spectrometry, 73: 147

A Study of Inhibition Effects of Silane Combustion by Additive Gases, 73: 187

Finite Chemical Kinetic Effects in a Subsonic Turbulent Hydrogen Flame, 73: 195

Structure of a Split Gas Flame, 73: 221

Global Reaction Schemes for Hydrocarbon Combustion, 73: 233

Turbulent Nonpremixed Flames of Methane Near Extinction: Probability Density Functions, 73: 261

Scalar Properties in the Overfire Region of Sooting Turbulent Diffusion Flames, 73: 315

Book Review of ''Principles of Combustion'' by Kenneth Kuan-yun Kuo, 73: 337

Conditional Probability Density Functions Measured in Turbulent Nonpremixed Flames of Methane Near Extinction, 74: 267

Book Review of ''Numerical Simulation of Reactive Flow'' by Elaine S. Oran and Jay P. Boris, 74: 311

21. FLAMES, NONSTEADY

Influence of Ducting on Explosion Pressure: Small-Scale Experiments, 71: 51

Book Review of ''Advanced Combustion Methods'' by Felix J. Weinberg, Editor, 71: 217

Deflagration to Detonation Transition in Mixtures of Alkane LNG/LPG Constituents with O_2/N_2, 72: 63

Cyclic Variations and Turbulence Structure in Spark-Ignition Engines, 72: 73

Effect of Exhaust Gas Recirculation on Diesel Knock Intensity and Its Mechanism, 72: 225

Book Review of ''Combustion, Flames & Explosions of Gases, 3rd edition,'' by B. Lewis and G. von Elbe, 73: 107

Experimental Study on Cellular Flame Propagation of Blend Fuels, 73: 207

Relative Influences of Convective and Diffusive Transports During Spherical Flame Initiation, 74: 161

Book Review of ''Numerical Simulation of Reactive Flow'' by Elaine S. Oran and Jay P. Boris, 74: 311

22. FLAMES, PREMIXED

Determination of Absolute H Atom Concentrations in Low-Pressure Flames by Two-Photon Laser-Excited Fluorescence, 71: 41

Two Simple Approximations to the Thermal Diffusion Factor and Their Applications to Flame Studies, 71: 89

Why Does Soot Inception Stop?, 71: 105

Book Review of ''Combustion'' by I. Glassman, 71: 107

Laminar Flamelet Modeling of Recirculating Premixed Methane and Propane-Air Combustion, 71: 109

Further Studies by CARS of Premixed Turbulent Combustion in a High Velocity Flow, 71: 147

Some Notes on the First Theories of the Flame Velocity in Gaseous Mixtures, 71: 179

Experimental Studies of Lower Flammability Limits of Gases and Mixtures of Gases at Elevated Temperatures, 71: 283

Spectral Behavior of Velocity Fluctuations in Premixed Turbulent Flames, 71: 313
A Continuous Flow, Gaseous Formaldehyde Generation System for Combustion Studies, 71: 325
The Measurement of NO_2 from Gas Flames, 71: 331
Kinetic Extinction: A Three-Step Model, 72: 27
The Lean Flammability Limit: A Four-Step Model, 72: 35
Deflagration to Detonation Transition in Mixtures of Alkane LNG/LPG Constituents with O_2/N_2, 72: 63
Cyclic Variations and Turbulence Structure in Spark-Ignition Engines, 72: 73
Formation of Small Aromatic Molecules in a Sooting Ethylene Flame, 72: 91
An Experimental and Theoretical Study of Autoignition on a Horizontal Hot Pipe, 72: 119
Measurement of Various Terms in the Turbulent Kinetic Energy Balance within a Flame and Comparison with Theory, 72: 131
Analysis of Fuel-Lean Combustion Using Chemical Mechanisms, 72: 271
An Integral Analysis of the Structure and Propagation of Stretched Premixed Flames, 72: 325
Simulation of Ionic Structure in Lean and Close-to-Stoichiometric Acetylene Flames, 73: 1
Asymptotic Structure and Extinction of Methane-Air Diffusion Flames, 73: 23
Influence of the Damköhlker Number on the Average Thickness of Conical Turbulent Premixed Methane/Air Flames, 73: 75
Microwave Resonance Lamp Absorption Technique for Measuring Temperature and OH Number Density in Combustion Environments, 73: 89
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107
Some Fluid Dynamic Considerations in the Modeling of Flames, 73: 111
Experimental Study on Cellular Flame Propagation of Blend Fuels, 73: 207
Pressure-Containing Correlations in Variable Density and Turbulent Reacting Flows, 73: 215
Global Reaction Schemes for Hydrocarbon Combustion, 73: 233
Entropy Production in Flames, 73: 251
Effects of Variable Density on a Tubular Flame, 73: 287
Propagation and Extinction of a Flame in a Stagnation—Point Flow, 73: 303
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
Relevant Scales in the Corrugated Flamelet Region, 74: 1
The Effect of Initial Conditions on the Propagation of a Premixed Flame in a Mixing Layer, 74: 9
Chemiionization and Ion-Molecule Reactions in Fuel-Rich Acetylene Flames, 74: 19
Burning Characteristics of Premixed Sprays and Gas-Liquid Coburning Mixtures, 74: 39
Concentration Measurements of Atomic Hydrogen in Subatmospheric Premixed $C_2H_4/O_2/Ar$ Flat Flames, 74, 221

23. FLAMES, TURBULENT

Predictions of Radiative Transfer from Nonhomogeneous Combustion Products Using the Discrete Transfer Method, 71: 79
Laminar Flamelet Modeling of Recirculating Premixed Methane and Propane-Air Combustion, 71: 109
Further Studies by CARS of Premixed Turbulent Combustion in a High Velocity Flow, 71: 147
Turbulent Nonpremixed Flames of Methane Near Extinction: Mean Structure from Raman Measurements, 71: 245
Spectral Behavior of Velocity Fluctuations in Premixed Turbulent Flames, 71: 313
The Measurement of NO_2 from Gas Flames, 71: 331
Cyclic Variations and Turbulence Structure in Spark-Ignition Engines, 72: 73
Measurement of Various Terms in the Turbulent Kinetic Energy Balance within a Flame and Comparison with Theory, 72: 131
Assessment of a Partial-Equilibrium/Monte Carlo Model for Turbulent Syngas Flames, 72: 159
Flow and Combustion Characteristics of an Annular Combustor, 72: 175

Response and Flamelet Structure of Stretched Premixed Methane-Air Flames, 73: 45
Influence of the Damhöhlker Number on the Average Thickness of Conical Turbulent Premixed Methane/Air Flames, 73: 75
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107
Finite Chemical Kinetic Effects in a Subsonic Turbulent Hydrogen Flame, 73: 195
Pressure-Containing Correlations in Variable Density and Turbulent Reacting Flows, 73: 215
Structure of a Split Gas Flame, 73: 221
Turbulent Nonpremixed Flames of Methane Near Extinction: Probability Density Functions, 73: 261
Scalar Properties in the Overfire Region of Sooting Turbulent Diffusion Flames, 73: 315
Relevant Scales in the Corrugated Flamelet Region, 74: 1
The Effect of Initial Conditions on the Propagation of a Premixed Flame in a Mixing Layer, 74: 9
Burning Characteristics of Premixed Sprays and Gas-Liquid Coburning Mixtures, 74: 39
Extraction of Useful Data from Noise-Contaminated PDFs, 74: 193
Conditional Probability Density Functions Measured in Turbulent Nonpremixed Flames of Methane Near Extinction, 74: 267

24. FLAMMABILITY
Experimental Studies of Lower Flammability Limits of Gases and Mixtures of Gases at Elevated Temperatures, 71: 283
Kinetic Extinction: A Three-Step Model, 72: 27
The Lean Flammability Limit: A Four-Step Model, 72: 35
Book Review of "Combustion, Flames & Explosions of Gases, 3rd edition," by B. Lewis and G. von Elbe, 73: 107

25. FLUID DYNAMICS, STEADY FLOW
Wave Processes in Scramjet Thrust Generation, 71: 63
Book Review of "Transport Processes in Chemically Reacting Flow Systems" by Daniel E. Rosner, 71: 215
Some Fluid Dynamic Considerations in the Modeling of Flames, 73: 111
A Model for the Evaporation of a Slowly Moving Droplet, 74: 111
Book Review of "Numerical Simulation of Reactive Flow" by Elaine S. Oran and Jay P. Boris, 74: 311

26. FLUID DYNAMICS, NONSTEADY AND INSTABILITY
Influence of Ducting on Explosion Pressure: Small-Scale Experiments, 71: 51
Book Review of "Transport Processes in Chemically Reacting Flow Systems" by Daniel E. Rosner, 71: 215
Effect of Exhaust Gas Recirculation on Diesel Knock Intensity and Its Mechanism, 72: 225
Book Review of "Numerical Simulation of Reactive Flow" by Elaine S. Oran and Jay P. Boris, 74: 311

27. FLUID DYNAMICS, TURBULENT
The Effects of Damköhler Number in a Turbulent Shear Layer, 71: 23
Predictions of Radiative Transfer from Nonhomogeneous Combustion Products Using the Discrete Transfer Method, 71: 79
Spectral Behavior of Velocity Fluctuations in Premixed Turbulent Flames, 71: 313
Measurement of Various Terms in the Turbulent Kinetic Energy Balance within a Flame and Comparison with Theory, 72: 131
Pressure-Containing Correlations in Variable Density and Turbulent Reacting Flows, 73: 215
Scalar Dissipation Measurements in the Developing Region of a Jet, 74: 147
Extraction of Useful Data from Noise-Contaminated PDFs, 74: 193

28. FUELS, OXIDIZERS AND ADDITIVES, NONCONVENTIONAL
The Effects of Damköhler Number in a Turbulent Shear Layer, 71: 23
Aerothermochemical Studies of Energetic Liquid Materials. 2. Combustion and Microexplo-

sion of Droplets of Organic Azides, 71: 123
Studies on the Synergistic Hypergolic Ignition of Hybrid Systems, 71: 233
A Continous Flow, Gaseous Formaldehyde Generation System for Combustion Studies, 71: 325
An Experimental and Theoretical Study of Autoignition on a Horizontal Hot Pipe, 72: 119
Thermal Decomposition of Energetic Materials 27. Synthesis, Characterization and Thermolysis of Cu(II)-Doped "Blue RDX," 72: 153
Radiative Properties of Burning Aluminum Droplets, 72: 287
A Study of Inhibition Effects of Silane Combustion by Additive Gases, 73: 187
Thermal Decomposition of Energetic Materials 29—The Fast Thermal Decomposition Characteristics of a Multicomponent Material: Liquid Gun Propellant 1845, 74: 81
Combustion of HAN-Based Liquid Monopropellants Near the Thermodynamic Critical Point, 74: 179
A Comparison of Calculations of Detonation Pressures for a Homologous Series of Polynitroaliphatic Explosives by Different Equations of State, 74: 295

29. HETEROGENEOUS COMBUSTION: AEROSOLS, SPRAYS AND AIRBORNE DUSTS
Influence of Ducting on Explosion Pressure: Small-Scale Experiments, 71: 51
Effect of Exhaust Gas Recirculation on Diesel Knock Intensity and Its Mechanism, 72: 225
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
Burning Characteristics of Premixed Sprays and Gas-Liquid Coburning Mixtures, 74: 39
Droplet Size and Equivalence Ratio Effects on Spark Ignition of Monodisperse N-Heptane and Methanol Sprays, 74: 285

30. HETEROGENEOUS COMBUSTION: CATALYTIC COMBUSTION
Book Review of "Advanced Combustion Methods" by Felix J. Weinberg, Editor, 71: 217
Combustion of Hydrogen-Rich Mixtures on a Nickel Oxide Catalyst, 72: 259

31. HETEROGENEOUS COMBUSTION: COAL, CHAR OR CARBON
Models of Tar Formation During Coal Devolatilization, 71: 137
Combustion of a Carbon Surface in a Stagnation Point Flow Field Part II: Ignition and Quench Phenomena, 71: 169
Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model, 72: 1
Indicators of Ignition for Clouds of Pulverized Coal, 72: 111
Velocity Measurements in a Swirl Driven Pulverized Coal Combustion Chamber, 72: 193
Partial Oxidation of Fuel-Rich Mixtures in a Spouted Bed Combustor, 72: 235
Combustion of Pulverized Coal Using Waste Carbon Dioxide and Oxygen, 72: 301
Formation and Behavior of Submicron Fly Ash in Pulverized Coal Combustion Furnace, 74: 71
Evidence for Formation of CO_2 in the Vicinity of Burning Pulverized Carbon Particles, 74: 91
The Oxygen Reaction Order of SO_2 with CaO, 74: 107
Reduction of NO Emissions from a Coal-Fired Fluidized Bed Combustor by Addition of NH_3 Through a Watercooled Injector, 74: 171
Influence of Ash on Particle Size Distribution Evolution During Coal Combustion 74: 207
Erratum: "The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model," *Combust. Flame* 72:1–12(1988), 74: 219
Low-Rank Coal-Water Fuel Combustion in a Laboratory-Scale Furnace, 74: 255

32. HETEROGENEOUS COMBUSTION: SINGLE DROPLET OR PARTICLE
Aerothermochemical Studies of Energetic Liquid Materials. 2. Combustion and Microexplosion of Droplets of Organic Azides, 71: 123

Asymptotic Structure and Extinction of Diffusion Flames with Chain Mechanism, 73: 127
On the Controlling Parameter in the Gasification Behavior of Multicomponent Droplets, 73: 331
Book Review of "Principles of Combustion" by Kenneth Kuan-yun Kuo, 73: 337
A Model for the Evaporation of a Slowly Moving Droplet, 74: 111
Combustion of HAN-Based Liquid Monopropellants Near the Thermodynamic Critical Point, 74: 179
Interactions Between Gaseous Electrical Discharges and Single Liquid Droplets, 74: 233

33. HETEROGENEOUS COMBUSTION: SLAB, POOL, FLUIDIZED BED, ETC.
The Chemistry of Premixed Hydrocarbon/Air Combustion in a Fluidized Bed, 71: 35
Characterization of Flame Spread Over PMMA Using Holographic Interferometry Sample Orientation Effects, 71: 189
Book Review of "Advanced Combustion Methods" by Felix J. Weinberg, Editor, 71: 217
Near Limit Flame Spread Over Thick Fuels in a Concurrent Forced Flow, 72: 205
The Formation of SO_3 in a Fluidized Bed, 72: 241
Effects of Radiative and Conductive Transfer on Thermal Ignition, 73: 67
Reduction of NO Emissions from a Coal-Fired Fluidized Bed Combustor by Addition of NH_3 Through a Watercooled Injector, 74: 171

34. INHIBITION
A Study of Inhibition Effects of Silane Combustion by Additive Gases, 73: 187
Book Review of "Fundamental Aspects of Polymer Flammability" by G. Cox and G. Stevens, Editors, 74: 311

35. IONIZATION AND/OR ELECTRICAL EFFECTS
Book Review of "Advanced Combustion Methods" by Felix J. Weinberg, Editor, 71: 217
Chemiionization and Ion-Molecule Reactions in Fuel-Rich Acetylene Flames, 74: 19
Ion-Molecule Reactions in Sooting Acetylene-Oxygen Flames, 74: 131
Interactions Between Gaseous Electrical Discharges and Single Liquid Droplets, 74: 233

36. KINETICS AND/OR REACTION MECHANISMS, DETAILED
The Development and Experimental Validation of a Mathematical Model for Predicting Hot-Surface Autoignition Hazards Using Complex Chemistry, 71: 1
The Effects of Damköhler Number in a Turbulent Shear Layer, 71: 23
Two Simple Approximations to the Thermal Diffusion Factor and Their Applications to Flame Studies, 71: 89
Kinetic Modeling of Ethylene Oxidation, 71: 295
A Kinetic Modeling Study of n-Pentane Oxidation in a Well-Stirred Reactor, 72: 45
Formation of Small Aromatic Molecules in a Sooting Ethylene Flame, 72: 91
An Experimental and Theoretical Study of Autoignition on a Horizontal Hot Pipe, 72: 119
Analysis of Fuel-Lean Combustion Using Chemical Mechanisms, 72: 271
Simulation of Ionic Structure in Lean and Close-to-Stoichiometric Acetylene Flames, 73: 1
Response and Flamelet Structure of Stretched Premixed Methane-Air Flames, 73: 45
Stationary-State and Oscillatory Combustion of Hydrogen in a Well-Stirred Flow Reactor, 73: 163
Chemiionization and Ion-Molecule Reactions in Fuel-Rich Acetylene Flames, 74: 19
Ignition Processes in Hydrogen-Oxygen Mixtures, 74: 53
Ion-Molecule Reactions in Sooting Acetylene-Oxygen Flames, 74: 131
Book Review of "Numerical Simulation of Reactive Flow" by Elaine S. Oran and Jay P. Boris, 74: 311

37. KINETICS AND/OR REACTION MECHANISMS, OVERALL
Book Review of "Combustion" by I. Glassman, 71: 107
Kinetic Extinction: A Three-Step Model, 72: 27

The Lean Flammability Limit: A Four-Step Model, 72: 35
Assessment of a Partial-Equilibrium/Monte Carlo Model for Turbulent Syngas Flames, 72: 159
Structure of the Thermal Explosion Limit, 72: 221
The Formation of SO_2 in a Fluidized Bed, 72: 241
Combustion of Pulverized Coal Using Waste Carbon Dioxide and Oxygen, 72: 301
Asymptotic Structure and Extinction of Methane-Air Diffusion Flames, 73: 23
Response and Flamelet Structure of Stretched Premixed Methane-Air Flames, 73: 45
Asymptotic Structure and Extinction of Diffusion Flames with Chain Mechanism, 73: 127
A Study of Inhibition Effects of Silane Combustion by Additive Gases, 73: 187
Global Reaction Schemes for Hydrocarbon Combustion, 73: 233
Evidence for Formation of CO_2 in the Vicinity of Burning Pulverized Carbon Particles, 74: 91
Book Review of "Numerical Simulation of Reactive Flow" by Elaine S. Oran and Jay P. Boris, 74: 311

38. POLLUTANTS: INORGANICS AND SOOT
Predictions of Radiative Transfer from Nonhomogeneous Combustion Products Using the Discrete Transfer Method, 71: 79
Why Does Soot Inception Stop?, 71: 105
Book Review of "Combustion" by I. Glassman, 71: 107
A Shock Tube Investigation of the Rate of Soot Formation for Benzene, Toluene, and Toluene/n-Heptane Mixtures, 71: 219
Erratum: "Comparative Study of Soot Formation on the Centerline of Axisymmetric Laminar Diffusion Flames: Fuel and Temperature Effects" *Combust. Flame* 70:225–241(1987), 71: 337
Formation of Small Aromatic Molecules in a Sooting Ethylene Flame, 72: 91
Real-Time Analysis of Polyaromatic Hydrocarbons in Flames Using Atmospheric Pressure Ionization and Tandem Mass Spectroscopy, 73: 147
Scalar Properties in the Overfire Region of Sooting Turbulent Diffusion Flames, 73: 315
Chemiionization and Ion-Molecule Reactions in Fuel-Rich Acetylene Flames, 74: 19
Formation and Behavior of Submicron Fly Ash in Pulverized Coal Combustion Furnace, 74: 71
Ion-Molecule Reactions in Sooting Acetylene-Oxygen Flames, 74: 131
Influence of Ash on Particle Size Distribution Evolution During Coal Combustion, 74: 207

39. POLLUTANTS: NOX
Book Review of "Combustion" by I. Glassman, 71: 107
The Measurement of NO_2 from Gas Flames, 71: 331
Reduction of NO Emissions from a Coal-Fired Fluidized Bed Combustor by Addition of NH_3 Through a Watercooled Injector, 74: 171
Low-Rank Coal-Water Fuel Combustion in a Laboratory-Scale Furnace, 74: 255

40. POLLUTANTS: OTHER
The Formation of SO_3 in a Fluidized Bed, 72: 241
The Oxygen Reaction Order of SO_2 with CaO, 74: 107

41. PROPELLANTS, PYROTECHNICS AND EXPLOSIVES
Aerothermochemical Studies of Energetic Liquid Materials. 2. Combustion and Microexplosion of Droplets of Organic Azides, 71: 123
Mechanism of Combustion of Catalyzed Double Base Propellants, 71: 205
Studies on the Synergistic Hypergolic Ignition of Hybrid Systems, 71: 233
A Theoretical and Numerical Study of Radiative Ignition and Deradiative Extinction in Solid Propellants, 72: 13
Thermal Decomposition of Energetic Materials 27. Synthesis, Characterization and Thermolysis of Cu(II)-Doped "Blue RDX," 72: 153
Radiative Properties of Burning Aluminum Droplets, 72: 287
Thermal Decomposition of Energetic Materials 29—The Fast Thermal Decomposition Char-

acteristics of a Multicomponent Material: Liquid Gun Propellant 1845, 74: 81
Combustion of HAN-Based Liquid Monopropellants Near the Thermodynamic Critical Point, 74: 179
A Comparison of Calculations of Detonation Pressures for a Homologous Series of Polynitroaliphatic Explosives by Different Equations of State, 74: 295

42. PYROLYSIS AND THERMAL DECOMPOSITION
Models of Tar Formation During Coal Devolatilization, 71: 137
The Combustion of Evolved Volatile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model, 72: 1
Thermal Decomposition of Energetic Materials 27. Synthesis, Characterization and Thermolysis of Cu(II)-Doped "Blue RDX," 72: 153
Near Limit Flame Spread Over Thick Fuels in a Concurrent Forced Flow, 72: 205
Thermal Decomposition of Energetic Materials 29—The Fast Thermal Decomposition Characteristics of a Multicomponent Material: Liquid Gun Propellant 1845, 74: 81
Erratum: "The Combustion of Evolved Volaile Matter in the Vicinity of a Coal Particle—An Evaluation of the Diffusion Limited Model," *Combust. Flame* 72:1–12(1988), 74: 219

43. RADIATION, SPECTRA AND EXCITED SPECIES
Predictions of Radiative Transfer from Nonhomogeneous Combustion Products Using the Discrete Transfer Method, 71: 79
A Theoretical and Numerical Study of Radiative Ignition and Deradiative Extinction in Solid Propellants, 72: 13
Radiative Properties of Burning Aluminum Droplets, 72: 287
Effects of Radiative and Conductive Transfer on Thermal Ignition, 73: 67

44. SMOLDERING AND LOW TEMPERATURE OXIDATION
The Development and Experimental Validation of a Mathematical Model for Predicting Hot-Surface Autoignition Hazards Using Complex Chemistry, 71: 1

45. THERMOCHEMISTRY AND THERMODYNAMICS
Entropy Production in Flames, 73: 251

46. TRANSPORT OF HEAT AND MASS
Predictions of Radiative Transfer from Nonhomogeneous Combustion Products Using the Discrete Transfer Method, 71: 79
Two Simple Approximations to the Thermal Diffusion Factor and Their Applications to Flame Studies, 71: 89
Characterization of Flame Spread Over PMMA Using Holographic Interferometry Sample Orientation Effects, 71: 189
Book Review of "Transport Processes in Chemically Reacting Flow Systems" by Daniel E. Rosner, 71: 215
Effects of Radiative and Conductive Transfer on Thermal Ignition, 73: 67
Relative Influences of Convective and Diffusive Transports During Spherical Flame Initiation, 74: 161
